

## Week in Review

I failed to get my 6 SDI projects converted over to javascript because I didn't find the 6 projects. So I decided to convert over my first 6 ASDI projects to javascript and found out that the first 3 were not uploaded to my repository correctly. So I had to settle for the 4<sup>th</sup> project, and that was incredibly difficult as I found out. So I am now submitting this one project 2 days late.
