

Tristan Richard Goetz  
Project and Portfolio 1

## Getting Started!

I setup my git repo with Github instead of Bitbucket. I am not a huge fan of Bitbucket (I use it at work) and I already had my previous Project and Portfolio repo in Github. Because the repo is on Github however, it is a public repo because I don't have an upgraded account with which to make a private repo. Here is the link to get to my repo:

<https://github.com/Goetz-Tristan-Portfolio/PAP2.git>

I am also storing my remote location on OneDrive under my personal account. I have added [jgarlic@fullsail.edu](mailto:jgarlic@fullsail.edu) as a can edit contributor. Here is the link to get to the folder in case that doesn't work:
